

**COMPLIANCE AUDIT FOR INTEGRATED EMERGENCY MEDICAL
TRANSPORTATION DATABASE SYSTEM**

Abstract of the Disclosure

5 An integrated medical database system for the emergency medical transportation business. In one aspect of the invention, the system includes a dispatch and demographic module, a clinical module, an administration module and a billing module. Each module may communicate data with one or more of the other modules to form a system incorporating data sharing, thus achieving an end-to-end automation of
10 emergency medical care accounting. Internal consistency checks using specific libraries of modifiable data rules are performed by the system to ensure that proper treatments are performed according to a chosen diagnosis. The system includes a compliance audit module operating on data from the dispatch module and clinical module. The compliance audit module checks to ensure that data is consistent with
15 high risk compliance areas. The results of the compliance audit module are forwarded to the billing module.
